## EXPERIENCE

---

**PHP TRAINEE** MAY 2022 - JUL 2022  
INFIRAISE *Gandhinagar, GUV, IN*

- Worked on web-based dynamic form builder which helps to make new forms
- Developer on a team of 5 working on the project
- Contributed to the enhancement of the company's ERP system, resulting in a substantial 40% improvement. This involved the introduction of new modules, as well as the revamping of existing ones within the ERP project.
- Learned Laravel, MySQL, Bootstrap, Github, and Gitlab.

**Full Stack Developer Intern** SEP 2022 - MAR 2023  
ArsenalTech Pvt. Ltd *Ahmedabad, GUV, IN*

- Worked on web project which made loan process easy for the citizens of Australia
- Developer on a team of 6 people contributing on the project.
- Worked on password migration feature. These efforts resulted into faster development process because the data migration was a huge task to perform
- Learned ReactJs, Typescript, React-Redux, Unit Testing, Agile Process (sprints, task management and team collaboration)

## PROJECTS

---

**Document Management System:-** Role:- Team Leader Technology:- PHP, MySQL As a Team Leader, I led the development of a Document Management System tailored for an internal client within our organization. I mainly worked on role-based accessing of documents like which users can have what type of permission on a specific document.

**Grocers:-** Role:- Backend Developer Technology:- PHP, MySQL On a team of 4 people I worked as a backend developer. I mainly worked on the admin management system which consisted of product management, sales management, and user management.
