EXPERIENCE

PHP TRAINEE   MAY 2022 - JUL 2022
INFIRAISE   *Gandhinagar, GUJ, IN*

- Worked on web-based dynamic form builder which helps to make new forms
- Developer on a team of 5 working on the project.
- Contributed to the enhancement of the company's ERP system, resulting in a substantial 40% improvement. This involved the introduction of new modules, as well as the revamping of existing ones within the ERP project.
- Learned Laravel, MySql, Bootstrap, Github, and Gitlab.

Full Stack Developer Intern   SEP 2022 - MAR 2023
ArsenalTech Pvt. Ltd   *Ahmedabad, GUJ, IN*

- Worked on web project which made loan process easy for the citizens of Australia.
- Developer on a team of 6 people contributing on the project.
- Worked on password migration feature. These efforts resulted into faster development process because the data migration was a huge task to perform.
- Learned ReactJs, Typescript, React-Redux, Unit Testing, Agile Process (sprints, task management and team collaboration).

PROJECTS

Sumazon:-
Technology:- MERN stack application
Developed a very basic e-commerce platform using MERN (Mongo, Express, ReactJs, NodeJs) stack to improvise the skills of ReactJs and also gain some knowledge in MERN stack.
Link to:- Sumazon

SmartSpend:-
Technology:- MEAN stack application
SmartSpend is developed for students who are facing issue in the terms of saving money. This web application helps them to put their entry of income and expenses they did in a month. Also my team had introduced concept of visualization of a monthly report to have a better look of their expenditure and source of income.
