

Yash Parasbhai Modi

(206) 396-5902 | modiy2433@gmail.com | [linkedin.com/in/yashpmodi/](https://www.linkedin.com/in/yashpmodi/)

Education:

Master of Science in Computer Science (Software Engineering), Seattle University | Seattle, WA Sep 2023 – Jun 2025

- Relevant Course: Software Engineering, Software Testing and Debugging, AI, Capstone Project, Mobile Software Development.
- Received 2 x Deans Honor Roll for excellence in academics.
- GPA: 3.5

Bachelor of Technology in Computer Engineering, CHARUSAT | Nadiad, GJ, India Sep 2019 – May 2022

- Relevant Course: OOP, Data Structures and Algorithms, Computer Networks, Design and Analysis of Algorithms.
- GPA: 3.5

Professional Experience:

Software Developer Intern, MedFilo Inc | New York, NY, USA Sep 2025 – Present

- Working on MedFilo's core APIs by identifying performance gaps and applying efficient design practices to ensure the application runs smoothly.
- Developing React Native components and integrating them with backend APIs to make features functional and improve the overall user experience.

Full Stack Software Developer, Snohomish County | Everett, WA, USA Sep 2024 – Mar 2025

- Developed reusable React components with dynamic filtering to enhance UX.
- Reduced data retrieval latency by 40% via MongoDB indexing and data partitioning.
- Wrote specs based on stakeholder feedback and resolved critical production bugs under pressure.
- On-call debugging experience: resolved a high-priority bug after 6+ hours of investigation.

Full Stack Developer, Arsenal Tech PVT LTD | Ahmedabad, GJ, India Sep 2022 – Mar 2023

- Delivered 5+ production-ready financial features using React, Redux, TypeScript, and Laravel.
- Integrated REST APIs supporting real-time workflows across distributed systems.
- Maintained >99.9% system uptime through test automation and proactive monitoring.
- Collaborated across Agile teams, participated in code reviews, and authored clear documentation.

Projects:

SmartSpend, MEAN Stack | Azure | GitHub | Planner Mar 2024 – June 2024

- Designed backend schema and retrieval strategies to model real-world storage workloads.
- Built REST APIs enabling real-time data sync and multi-user document collaboration.
- Cut runtime errors by 60% by introducing TypeScript and structured logging.
- Led Azure deployment using App Services and monitored system health post-deployment.

SUMAZON, MERN Stack | GitHub | Planner Jan 2024 – Mar 2024

- Built a full-stack e-commerce platform using MongoDB, Express.js, React.js, and Node.js for Seattle University.
- Designed and implemented system architecture across the entire stack, following Agile methodology with 4 sprints.
- Applied Test-Driven Development (TDD) to ensure code quality and reliability.
- Developed RESTful APIs in Node.js and integrated them with React for seamless data storage and retrieval.
- Enhanced UI/UX using Bootstrap, FontAwesome, and Figma for a polished, user-friendly interface.
- Ensured cross-browser compatibility and responsive design across Chrome, Firefox, Edge, and Safari, improving accessibility and user experience.

Skills:

Programming Languages: JavaScript, TypeScript, Java, PHP, HTML/CSS, Semantic HTML, Accessibility (WCAG)

Frameworks and Libraries: Spring Boot, React.js, Angular, Node.js, Laravel, Redux, React Native

Databases: SQL, MongoDB, PostgreSQL

Tools and Platforms: Git, Docker, Azure, AWS, CI/CD, Jira, Postman, VS Code

Testing: Jest, Mocha, Chai, Selenium, Pytest, JUnit

Software Development Practices: OOP, REST API Design, Agile, TDD, Scrum, RBAC, GitHub Actions

Participation and Achievements:

- Participated in Hackathon held by Open Source for AI.
- Participated in software design competition held by Computer Society of India – Region 3.
